New York State Science Honor Society

New York State Science Honor Society

The New York State Science Honor Society was established to recognize students who excel in science. The students who are members have demonstrated their science ability not only in the science classroom but in science related activities in the school and community. They have been involved with distinction in such activities as science research, Science Congress, Science Olympiad, peer tutors in science, hospital junior volunteers, science clubs and many other such activities. NYSSHS provides activities and an environment where these students can further develop their knowledge of science and technology.
